INTERNATIONAL PRELIMINARY International application No. PCT/IB 03/02512 EXAMINATION REPORT - SEPARATE SHEET

Concerning 1

The following amendments go beyond the disclosure in the application as filed and do therefore contravene Article 34(2)(b) PCT:

- in amended claim 1, it is stated that the trolley has at least one elongate curved leg although the trolley according to the original disclosure has a pair of elongate curved leds.
- in amended claim 4, the range is 0,5 0,6m although in original claim 4, the range is 0,45 0,6m;
- in amended claim 19 it is not indicated anymore that the trolley is secured to the vehicle such that the holder has an orientation similar to its orientation when the trolley is on the ground.

Concerning V

The application relates to a shopping trolley which can be stored in the boot of a vehicle. The nearest state of the art is disclosed in prior art document EP-A-0286520 which shows a foldable trolley.

Claim 1 defines slidably retractable curved legs instead of a foldable structure. This solution, which is not suggested by the available prior art, permits loading the trolley into the vehicle without exposing the shopper to the weight of the trolley's content. For the above reasons the requirements of Article 33 (2) and (3) PCT are met.

Dependent claims 2-19 relate to improvements of the inventive subject-matter defined in claim 1 and do therefore also meet the requirements of Articles 33 (2) and (3) PCT.
